1.2. Motivation The reason I choose the project is with my past experiance. Once Currently I'm supporting for my family I. supporting to my family business which owns by my parents. The thing One of my mais dutie is to tra Collect goods from Supply products to the middle partie. Because of this reason I'm traveling long distances away from home. As to my past experiance I had to wait wasting many hours in the road # side in vehicle breakdowns. Morevere, it was very tiring and stressful to find someone to recover the problem. I felt that thus Should be a proper. Organized system to nadle such type of situations. Accordin to Service Providers pe Ctechnician, Mechoics) Perspective they are also coosey. Further they attaced greater difficulties conco as caithout basino austomers in finding a customer Hisoso without having a proper System because some of the customs had the benefit of getting special

bas ed op their customies relationship.

Motivated me to work on a Custommer user friendly, economical system which can be develope until Doline Dutomobile Service Platform.
